WORK EXPERIENCE

- React Native Tech Lead** 03/2024 – 09/2025
Swivl
- Providing technical leadership and guidance to a software development team, balancing hands-on development with architectural decisions, team mentorship, and project execution to ensure a product's technical success.
- Next.js Developer** 04/2023 – 02/2024
ProductCrafters
- Developed and maintained a Next.js dashboard application for EV vehicles.
- React Native Developer** 07/2021 – 11/2022
S-PRO
- Developed and supported React Native mobile applications.
- React Native / Fullstack Node.js Developer** 02/2019 – 02/2021
MySales Labs
- Developed React Native mobile applications and supported desktop Node.js/SQL web apps.
- React / React Native Developer** 11/2016 – 12/2018
Lenal
- Developed React and React Native applications for various clients.
- Frontend Developer** 09/2015 – 09/2016
Kvadrat LLC
- Built landing pages using PHP and WordPress.

TECH STACK

Frontend & Mobile — TypeScript, React Native, Expo, Redux, React Query, Figma | **Backend & APIs** — Golang, PostgreSQL, GraphQL, Firebase, Supabase, Stripe, Auth0, Rest API, Axios, Docker | **Monitoring & Analytics** — Sentry, Maestro, PostHog | **Other Tools** — Skia, Jest, HTML5, CSS3, Auth0, Apple Human Interface Guidelines, Android material design

LANGUAGES

English — Upper-Intermediate | **Ukrainian** — Native

PORTFOLIO PROJECTS

- Swivl**  2025 – 2026
Field Service Platform (B2B)
Led development of a field service platform (mobile app) used to manage end-to-end operations — scheduling, dispatch, CRM, invoicing, and payments.
Designed and implemented core systems enabling technicians to manage jobs, capture work on-site, and handle payments directly from the app. Focused on real-time data synchronization, system reliability, and scalable architecture.
- Planibble**  2023 – 2024
Health & Fitness Marketplace (B2C)
Worked on a two-sided platform connecting users with nutrition coaches, supporting real-time communication, personalized guidance, and content delivery.
Designed and implemented key parts of the mobile architecture, including chat systems, media handling, and scalable state management.
- Aspect Pro** 2021 – 2022
BLE LED Control
Built a React Native app to control an LED matrix over Bluetooth Low Energy.
Features include real-time brightness/saturation control, predefined color schemes, and on-device color palette generation from images.
Handled full BLE lifecycle — device discovery, pairing, connection state, and characteristic writes.
